

## Greenhouse gas emissions (GHG)

This table represents our GHG inventories for the current and historic periods, originally calculated, recalculated and rebaselined.

<sup>1</sup> The rebaselined numbers reflect the 2021 GHG emissions according to the Company's 2023 operational boundary.

<sup>2</sup> Includes gas consumption from Gas Fast Ltd, but excludes diesel consumption from their fleet of three vehicles.

<sup>3</sup> Represents the electricity consumption of Gas Fast Ltd which is not part of the Wickes Building Supplies Ltd renewable electricity contract, which comprises 0.04% of the total electricity consumption of the Group.

<sup>4</sup> In 2023, we excluded all emissions in Scope 3 Category 4 Upstream Transportation and Distribution as we identified opportunities to significantly improve on the previous assumptions made in 2021 and 2022. We incorporated this methodology change into our 2021 rebaselining exercise carried out in 2024, when we will also recalculate 2022 and 2023 in line with the improvements.
